

risk + mediation

Risk Management

The risks that may impact upon an organisation can often be difficult to predict and manage. Risk management is very broad but remains an integral part of successful business management.

It is especially relevant in relation to contract review and business practices affected by claims frequency.

Our extensive liability experience provides us with a unique perspective and knowledge to assist clients to identify the risk management implications of past claims and to implement appropriate changes to assist their business.

Our expertise extends to the provision of advice to a wide variety of clients susceptible to liability claims including government, local government, professionals, product manufacturers and sellers, and property owners.

Mediation

We offer mediation services, as Kevin Gibbons is an accredited LEADR mediator.

Indemnitylegal offers broad legal knowledge and expertise, combined with specialist legal services in the areas of insurance law, liability litigation, government (local and state), OH&S and environment advice and litigation, contract review and general commercial and personal legal services.

Indemnitylegal, with their expert industry knowledge, experience and technical excellence, can deliver to corporate clients high quality legal services, to complement and support the work of your in-house legal counsel.

Indemnitylegal's principal is Kevin Gibbons. Kevin has over 30 years experience in insurance law and in providing these types of services to clients.
